

Services Included in the 6-month Recovery Program

Counseling

Up to 30 sessions of individual or family counseling

**Missed appointments without a 24 hour cancellation notice count as used appointments.*

Nursing

Scheduled check-ups with the nurse as needed

Medication management/adjustment/refills

Administration of the Vivitrol injection as needed

Drug Screening/Breathalyzer

Regular/Random drug and alcohol screening as determined by the treatment team

Group Counseling

Unlimited use of PHS's groups, scheduled Monday through Saturday

Family Support Group

Unlimited use of PHS's two weekly groups for family members, facilitated by a family therapist

End of Program Meeting

Session with the Program Director upon completion of the program to select an Aftercare Program or discharge options

Counseling

Additional individual or family counseling sessions may be purchased for \$125/session or 12 sessions for \$1200. Additional purchased sessions may be used during or after the end of the 6-month program.

Intervention

\$1000-An intervention is a carefully planned meeting by which loved ones force a client to choose between treatment and clearly articulated consequences (such as removal of familial support). The cost of the service covers up to 7 hours of planning with a therapist, preparation of family letters, and the therapist's participation in the intervention.

**PHS clients are responsible for the cost of any medication prescribed through the program, including Suboxone, naltrexone, and Vivitrol. Persons with insurance may use their medication benefits to cover all or part of their medication costs as determined by their policy. Clients who have met their medication deductible may receive up to \$500 of copay assistance for each Vivitrol shot (up to 13 months) through Alkermes's Touchpoints program.*
